

# CITY OF CAPE TOWN

## 2018/2019 TARIFFS, FEES AND CHARGES

### PREAMBLE

The purpose of the Tariffs, Fees and Charges book is to outline fees, charges or tariffs in respect of any function or service to the local community which a municipality may set, and includes a surcharge on such tariff.

A Consumer Price Index (CPI) increase of 5.5% was used as a guideline in compiling these schedules and amounts have been rounded to the nearest R1,00 where possible. Tariffs, fees and charges are grouped into cost recovery categories and were reviewed in terms of its relevance and income generating potential.

### ALL TARIFFS ARE EFFECTIVE FROM 1 JULY

All Miscellaneous and Consumptive tariffs include VAT except

Fines, Penalties, Refundable Deposits, Housing and Contracted road-based public transport which are exempt from VAT

**Tariffs are determined in terms of:**

The Local Government Municipal Finance Management Act 56 of 2003

The Local Government Municipal Systems Act 32 of 2000

The Local Government Municipal Property Rates Act 6 of 2004

VAT is calculated at 15% in terms of the Value- Added Tax Act No.89 of 1991

Network Management	71.1	71.5	Sean Glass	444-9011

**KEY TO COST RECOVERY CATEGORIES:**

PARTIAL COST RECOVERY (PCR)	Where tariffs are set to recuperate, at least in part, the costs of products or services that provide benefits to the users to encourage local economic development e.g. Informal Trading
SUBSIDISED (S)	Where one group of users pay more than the costs of the goods/services that they receive, and the 'surplus' is used to offset the cost of goods/services provided to other users within the same service e.g. Electricity (Lifeline); Water & Sanitation (Domestic Full - Step 1 & 2); Solid Waste (240L Container Service)
SOCIAL BENEFIT (SB)	Where tariffs are set at affordable levels which encourages usage and does not cover the cost of products or services (neither partially nor fully) but provides benefits to low income users e.g. pauper burials/cremations
MARKET RELATED (MR)	Where tariffs are set at a level to ensure financial sustainability of the service e.g. Electricity (Large Power Users)
FULL COST RECOVERY (FCR)	Where tariffs are set to recuperate all costs associated with specific products or services. Full cost represents the value of all the resources used or consumed in the provision of the product or service. In addition to the costs directly associated with these, full cost includes an appropriate allocation of indirect (including capital) costs.
